

Distinguished DVC Science Alumni Lecture

An insider's look at
the drug discovery process

David B. Smith, PhD, Organic Chemistry (Harvard)
Principal Research Scientist, Medicinal Chemistry, Roche Palo Alto

How did this kid get into drugs?

Dave Smith has worked in the pharmaceutical industry for many years, producing numerous potential new drugs and over 60 patents and major publications. He will talk about the joys and tribulations of his search for treatments for diseases such as osteoporosis, asthma, inflammation, Alzheimer's, and hepatitis C.

(The picture is of Dave in about 1980 when he attended DVC)

Thursday, November 20 at 7:00 p.m.
at Diablo Valley College, in the Trophy Room

(the Trophy Room is in the cafeteria building on the side facing the box office)

Admission is free.

Refreshments and a reception for the speaker will follow the talk/slide show.

For directions or a free parking pass for the event (as availability permits),
call Linda Barnes 925-685-1230, ext. 2423
